Local Testimonial

	<p>In the past we'd really struggled filling roles for our IT department and found the process to be time consuming and unrewarding. A speculative email from Senitor changed that. They quickly responded to our needs and found candidates of the right calibre. The whole process was straight forward and within a couple of weeks of our first contact with them we had a new developer join the team. I would have no hesitation in recommending them to other businesses.</p> <p>Neil Wilks, Operations Manager, Auger Site Investigations Ltd T/A Auger</p>
